## WHAT IS CLAIMED IS:

- 1. A method of detecting the concentration or expression level of FCR3.varCSA or FCR3.varCSA in a biological sample from a tested subject comprising the step of comparing the concentration or expression level of a first sequence selected from the group consisting of FCR3.varCSA gene, FCR3.varCSA RNA, FCR3.varCSA cDNA, and FCR3.varCSA polypeptide from the biological sample with the concentration or expression level of a second sequence selected from the group consisting of FCR3.varCSA gene, FCR3.varCSA RNA, FCR3.varCSA cDNA, and FCR3.varCSA polypeptide from a healthy subject or FCR3.varCSA gene, FCR3.varCSA RNA, FCR3.varCSA cDNA, and FCR3.varCSA cDNA, and FCR3.varCSA polypeptide from a subject afflicted with malaria.
- 2. A method of making a FCR3.varCSA disease-state profile comprising:

providing a biological sample; and

15

20

25

30

10

5

detecting in the biological sample a concentration or expression level of *FCR3.varCSA* or FCR3.varCSA.

- 3. A purified or isolated nucleic acid comprising the sequence of SEQ ID NO: 1 or a sequence complementary thereto.
- 4. A purified or isolated nucleic acid comprising at least 9 consecutive bases of the sequence of SEQ ID NO.: 1 or a sequence complementary thereto.
- 5. The purified or isolated nucleic acid of Claim 4, wherein said nucleic acid comprises a DBL3 domain or CIDR1 domain or fragment thereof.
- 6. A purified or isolated nucleic acid comprising at least 9 consecutive bases of the sequence of SEQ ID NO.: 1, wherein the nucleic acid has a nucleotide sequence found in a *var* gene that encodes a protein that binds to chondroitin sulfate A that is at least 80% homologous to *FCR3.varCSA* or a sequence complementary to SEQ. ID. NO.: 1 or said *var* gene.
- 7. A purified or isolated nucleic acid encoding a polypeptide having the sequence of SEQ ID NO.: 2.
- 8. A recombinant construct comprising the coding region of SEQ ID NO.: 1 operably linked to a heterologous promoter.

10

15

20

25

30

- 10. A vector comprising the isolated DNA of Claim 5.
- 11. An isolated nucleic acid molecule that hybridizes to SEQ. ID. NO. 1 at 37°C in the presence of 0.5M NaPO4 (pH 7) and 7% SDS and under wash conditions of 37°C, in 6X SSC and 0.2% SDS, wherein the nucleic acid molecule has a sequence complementary to a sequence found in a *var* gene that encodes a protein that binds to chondroitin sulfate A that is at least 80% homologous to *FCR3.varCSA*.
- 12. A purified or isolated protein comprising the sequence of SEQ ID NO.: 2.
- 13. The purified or isolated protein of Claim 12, wherein at least one acidic amino acid contained therein is replaced with a different acidic amino acid.
- 14. The purified or isolated protein of Claim 12, wherein at least one basic amino acid contained therein is replaced with a different basic amino acid
- 15. The purified or isolated protein of Claim 12, wherein at least one nonpolar amino acid contained therein is replaced with a different nonpolar amino acid.
- 16. The purified or isolated protein of Claim 12, wherein at least one uncharged amino acid contained therein is replaced with a different uncharged amino acid.
- 17. The purified or isolated protein of Claim 12, wherein at least one aromatic amino acid contained therein is replaced with a different aromatic amino acid.
- 18. A purified or isolated polypeptide comprising at least 3 consecutive amino acids of the sequence of SEQ ID NO.: 2, wherein the polypeptide binds to chondroitin sulfate A (CSA).
- 19. A purified or isolated polypeptide comprising at least 3 consecutive amino acids of the sequence of SEQ ID NO.: 2, wherein the amino acid sequence of the polypeptide is found in molecule that binds to chondroitin sulfate A (CSA) that is at least 80% homologous to FCR3.varCSA.
- A purified or isolated polypeptide, wherein the polypeptide is at least 80% identical to the polypeptide having the amino acid sequence of SEQ. ID. NO. 1 as determined by FASTA or BLAST using default opening and gap penalties and a PAM 250 scoring matrix.

| 21.  | A p   | ourified or isolated polypeptide comprising a DBL3 or CIDR1   |  |  |
|--|---|---|--|--|
| domain or fragment thereof consisting of at least 9 amino acids of SEQ. ID |   |   |  |  |
| No.:2.   |   |   |  |  |
| 22.  | A m   | nethod of making a protein having the sequence of SEQ ID NO.: 2   |  |  |
| sing:  |   |   |  |  |
| (  | obtainir  | ng a cDNA comprising the sequence in SEQ ID NO.: 1;   |  |  |
| inserting said cDNA in an expression vector such that said cDNA is         |   |   |  |  |
| operably linked to a promoter; and   |   |   |  |  |
| introducing said expression vector into a host cell whereby said host cell |   |   |  |  |
| produces the protein encoded by said cDNA.                                 |   |   |  |  |
| 23. The method of Claim 22, further comprising isolating the protein.      |   |   |  |  |
| 24.  | An  | isolated FCR3.varCSA polypeptide that promotes adhesion to  |  |  |
| CSA wherein the polypeptide is selected from the group consisting of:      |   |   |  |  |
| (  | (a)   | a polypeptide having the amino acid sequence of SEQ. ID NO. 2   |  |  |
|  | (b)   | a polypeptide encoded by the nucleic acid of Claim 3, 4, 5, 6, or   |  |  |
|  | domain No.:2. 22. sing: operabl produce 23. 24. CSA w | domain or frag No.:2.  22. A n sing: obtaining inserting operably linked introdu produces the produces the produces the produces.  24. An |  |  |

20

25

30

(a) or (b) as determined by FASTA or BLAST using default opening and gap penalties and a PAM 250 scoring matrix. A method for constructing a transformed host cell that expresses SEQ 25. ID NO.: 3 comprising transforming the host cell with a recombinant DNA vector

a polypeptide that is at least 70% identical to the polypeptide of

comprising the sequence of SEQ ID NO.: 1.

- 26. A cultured cell line comprising the vector of Claim 9.
- 27. A cultured cell line comprising the vector of Claim 10.
- 28. A purified or isolated antibody capable of specifically binding FCR3.varCSA, wherein the antibody recognizes an epitope found on a var protein that binds to chondroitin sulfate A that is unique to a class of var proteins having a structure that is at least 80% homologous to FCR3.varCSA.
- 29. The antibody of Claim 28, wherein the antibody is a monoclonal antibody.

30.

|    | ID. No. 2.   |
|----|--|
|    | 31. The antibody of Claim 30, wherein the antibody is a monoclonal                 |
|    | antibody.  |
| 5  | 32. An isolated or purified biological complex comprising FCR3.varCSA              |
|    | and a ligand for FCR3.varCSA.  |
|    | 33. An isolated or purified biological complex comprising a molecule               |
|    | selected from the group consisting of FCR3.varCSA, a fragment of                   |
|    | FCR3.varCSA, A4 tres DBL3-γ, and ItG2-CS2 DBL2-γ joined to chondroitin             |
| 10 | sulfate A (CSA) or an analog thereof.  |
|    | 34. A method of identifying FCR3.varCSA dependent adhesion to                      |
|    | chondroitin sulfate A (CSA) comprising:  |
|    | providing a support having chondroitin sulfate A (CSA) or a                        |
|    | representative fragment thereof;   |
| 15 | contacting the support with FCR3.varCSA or a representative fragment               |
|    | thereof; and   |
|    | detecting FCR3.varCSA dependent adhesion.  |
|    | 35. The method of Claim 34, wherein the support is selected from the               |
|    | group consisting of a resin, a plastic reservoir, a lipid bilayer, and a cell.     |
| 20 | 36. The method of Claim 34, wherein the FCR3.varCSA is joined to a                 |
| 1  | second support selected from the group consisting of a resin, a plastic reservoir, |
|    | a lipid bilayer, and a cell.   |
|    | 37. A method of identifying an agent that modulates FCR3.varCSA                    |
|    | dependent adhesion to chondroitin sulfate A (CSA) comprising:                      |
| 25 | providing a support having chondroitin sulfate A (CSA) or a                        |
|    | representative fragment thereof;   |
|    | contacting the support with FCR3.varCSA or a representative fragment               |
|    | thereof;   |
|    | contacting the support with the agent; and   |
| 30 | detecting FCR3.varCSA dependent adhesion.  |
|    |  |

A purified or isolated antibody that binds DBL3 or CIDR1 of SEQ.

(CSA).

|                              | 38. The method of Claim 37, wherein the support is selected from the                |  |  |  |  |  |  |
|------------------------------|---|--|--|--|--|--|--|
|                              | group consisting of a resin, a plastic reservoir, a lipid bilayer, and a cell.      |  |  |  |  |  |  |
|                              | 39. The method of Claim 37, wherein the FCR3.varCSA is joined to a                  |  |  |  |  |  |  |
|                              | second support selected from the group consisting of a resin, a plastic reservoir,  |  |  |  |  |  |  |
| a lipid bilayer, and a cell. |   |  |  |  |  |  |  |
|                              | 40. A method of identifying an agent that modulates FCR3.varCSA                     |  |  |  |  |  |  |
|                              | dependent adhesion to chondroitin sulfate A (CSA) comprising:                       |  |  |  |  |  |  |
|                              | providing a support having FCR3.varCSA or a representative fragment                 |  |  |  |  |  |  |
|                              | thereof that has a polypeptide sequence found in a var protein that binds to        |  |  |  |  |  |  |
|                              | chondroitin sulfate A and is at least 80% homologous to FCR3.varCSA.;               |  |  |  |  |  |  |
|                              | contacting the support with the agent; and  |  |  |  |  |  |  |
|                              | detecting FCR3.varCSA dependent adhesion to chondroitin sulfate A                   |  |  |  |  |  |  |
|                              | (CSA).  |  |  |  |  |  |  |
|                              | 41. The method of Claim 40, wherein the FCR3.varCSA is joined to a                  |  |  |  |  |  |  |
|                              | second support selected from the group consisting of a resin, a plastic reservoir,  |  |  |  |  |  |  |
|                              | a lipid bilayer, and a cell.  |  |  |  |  |  |  |
|                              | 42. The method of Claim 40, wherein the support is selected from the                |  |  |  |  |  |  |
|                              | group consisting of a resin, a plastic reservoir, a lipid bilayer, and a cell.      |  |  |  |  |  |  |
|                              | 43. The method of Claim 40, wherein the CSA is joined to a second                   |  |  |  |  |  |  |
|                              | support selected from the group consisting of a resin, a plastic reservoir, a lipid |  |  |  |  |  |  |
|                              | bilayer, and a cell.  |  |  |  |  |  |  |
|                              | 44. A method of identifying an agent that modulates FCR3.varCSA                     |  |  |  |  |  |  |
|                              | dependent adhesion to chondroitin sulfate A (CSA) comprising:                       |  |  |  |  |  |  |
|                              | providing a cell transfected with a construct comprising a nucleic acid             |  |  |  |  |  |  |
|                              | sequence encoding FCR3.varCSA or a representative fragment thereof that has a       |  |  |  |  |  |  |
|                              | nucleotide sequence found in a var gene that encodes a protein that binds to        |  |  |  |  |  |  |
|                              | chondroitin sulfate A that is at least 80% homologous to FCR3.varCSA;               |  |  |  |  |  |  |
|                              | contacting the cell with the agent; and   |  |  |  |  |  |  |
|                              | detecting FCR3.varCSA dependent adhesion to chondroitin sulfate A                   |  |  |  |  |  |  |

45. A method of identifying an agent that interacts with the sequence set forth in SEQ ID NO.: 2 or a representative fragment thereof that has an amino acid sequence not found in another var protein comprising:

transfecting a cell with a nucleic acid encoding the sequence set forth in SEQ ID NO.: 1 or 2 or a representative fragment thereof that has a nucleotide sequence encoding FCR3.varCSA or a representative fragment thereof that has a nucleotide sequence found in a *var* gene that encodes a protein that binds to chondroitin sulfate A that is at least 80% homologous to *FCR3.varCSA*;

contacting the cell with the agent; and

detecting an interaction of the agent and a polypeptide encoded by the sequence set forth in SEQ ID NO.: 2 or a representative fragment thereof that has a nucleotide sequence found in a *var* gene that encodes a protein that binds to chondroitin sulfate A that is at least 80% homologous to *FCR3.varCSA*.

46. A method of preparing a therapeutic agent comprising:

providing an agent that modulates FCR3.varCSA-dependent adhesion to

CSA; and

mixing with the agent a pharmaceutically acceptable carrier.

A pharmaceutical comprising an antibody of Claims 28, 29, 30, or 31 or an agent identified according to any one of Claims 37-46 and a pharmaceutically acceptable carrier.

48. A method of treatment and prevention of maternal malaria comprising:

identifying a patient at risk for contracting maternal malaria or a patient afflicted with maternal malaria; and

administering a therapeutically effective amount of a nucleic acid complementary to at least 15 consecutive nucleotides of SEQ. ID. NO. 1, wherein the nucleic acid is complementary to a sequence encoding FCR3.varCSA or a representative fragment thereof that has a nucleotide sequence found in a *var* gene that encodes a protein that binds to chondroitin sulfate A that is at least 80% homologous to *FCR3.varCSA*.

| 49. The method of Claim 48 further comprising administering a                    |
|--|
| pharmaceutically acceptable carrier or adjuvant.                                 |
| 50. A method of treatment and prevention of maternal malaria                     |
| comprising:  |
| identifying a patient at risk for contracting maternal malaria or a patient      |
| afflicted with maternal malaria; and   |
| administering a therapeutically effective amount of a polypeptide having         |
| at least 3 consecutive amino acids of SEQ. ID. NO. 2, wherein the amino acid     |
| sequence is found in a protein that binds chondroitin sulfate A that is at least |
| 80% homologous to FCR3.varCSA.   |
| 51. The method of Claim 50, further comprising administering a                   |
| pharmaceutically acceptable carrier or adjuvant.                                 |
| 52. A method of treatment and prevention of maternal malaria                     |
| comprising:  |
| identifying a patient at risk for contracting maternal malaria or a patient      |
| afflicted with maternal malaria; and   |
| administering a therapeutically effective amount of a peptide agent that         |
| corresponds to at least 3 consecutive amino acids of SEQ. ID. NO. 2, wherein     |
| the amino acid sequence is found in a protein that binds chondroitin sulfate A   |
| that is at least 80% homologous to FCR3.varCSA.                                  |
| 53. The method of Claim 52, further comprising administering a                   |
| pharmaceutically acceptable carrier or adjuvant.                                 |
| 54. A method of treatment and prevention of maternal malaria                     |
| comprising:  |
| identifying a patient at risk for contracting maternal malaria or a patient      |
| afflicted with maternal malaria; and   |
| administering a therapeutically effective amount of a peptide agent that         |
| corresponds to at least 3 consecutive amino acids of SEQ. ID. NO. 9 or 11,       |
| wherein the amino acid sequence is found in a protein that binds chondroiting    |
| sulfate A  |

55. The method of Claim 54, further comprising administering a pharmaceutically acceptable carrier or adjuvant.
